**New: Including  
MacBrowser**

## NTFS FOR MAC® OS X 7

Break down the barriers between Windows® and Mac® OS

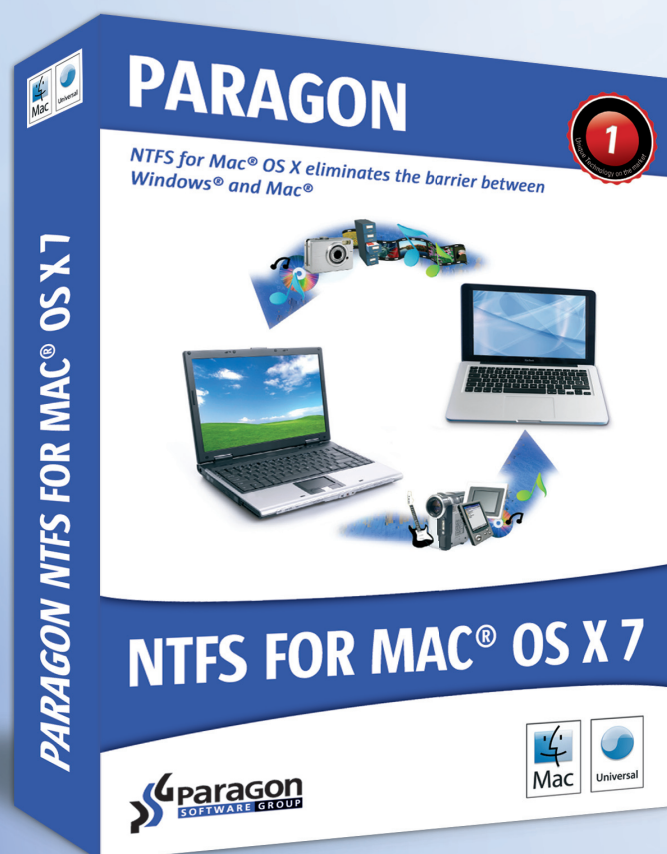

Including the new MacBrowser for Windows®, NTFS for Mac® OS X provides a unique and complete solution, creating an *effective two-way communication channel between Mac® OS X and Windows®*. Effectively you get *two products in one*: one for Windows®, and one for Mac®. You can browse contents, read and modify files, copy and create new files and folders on both file systems *with both operating systems!*

Use both - Mac® and Windows® to access all files:

- Read and write access to Mac®-disks from your Windows operating system
- Instant and complete access to all Windows files and folders from your Mac®.
- Easy, safe installation and usage on Mac® or Windows®.
- Unhampered data exchange between PC and Mac®.
- Share Windows files as a Mac® user via external disk drives.
- Access Windows video files on your Mac® to cut and post-produce them.
- Access .doc- and .pdf-files on your Mac®.

### Features/Benefits

- MacBrowser
- Improved NTFS Performance from Mac® OS X
- Full read/write access to Windows® volumes
- All NTFS versions supported
- Exceptional ease of use
- Maximun stability
