

Drive Backup 9.0

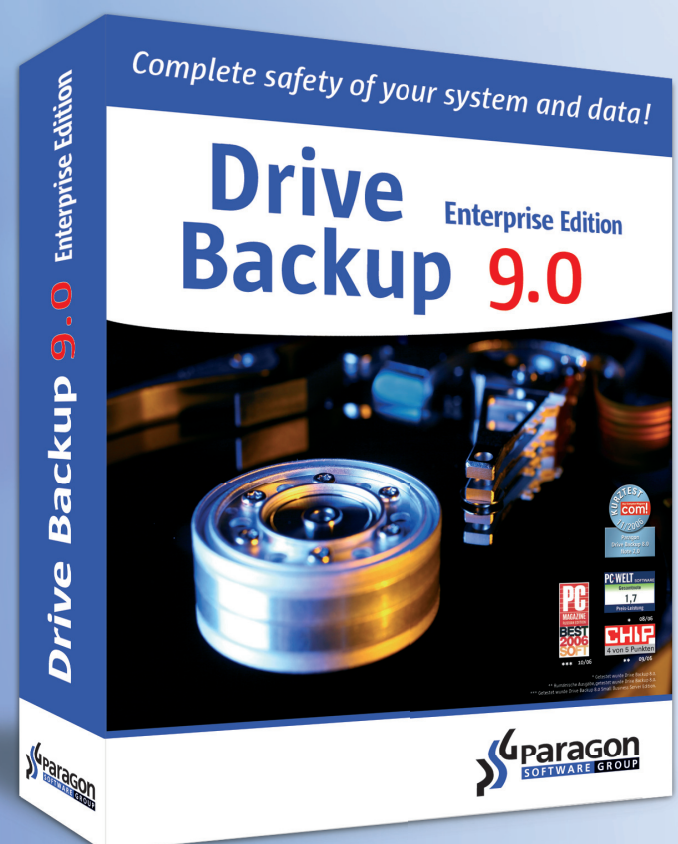

Enterprise Server

Paragon's Drive Backup 9.0 Enterprise Server provides for business continuity through comprehensive system protection of Windows servers and workstations. Businesses face a continual challenge to ensure that the IT environment is properly protected in the most cost-effective manner possible. Drive Backup Enterprise Server provides powerful disk-imaging disaster recovery tools to ensure that your business-critical data can be quickly recovered, regardless of where it is stored on the network. The complexity of providing a comprehensive solution is simplified with included remote management tools. Whether data resides on a Windows file server; or on a critical application

server like Exchange or SQL, Drive Backup Enterprise Server has the capability and compatibility to offer full protection and recovery for both data and systems across your WAN or LAN.

Key Benefits:

- Centralized network architecture to control backup tasks on servers and workstations
- Easily meet strict recovery time objectives (RTOs) by recovering complete systems in minutes, even from a bare-metal state
- Capture the entire live Windows system or back up and restore individual files and folders, without disrupting user productivity or application usage
- Scriptable operations for automatic backup and recovery
- Dissimilar hardware restoration with Paragon Adaptive Restore technology including support for the complete Windows Server 2008 platform
- Create server snapshots for consolidation
- Migrate between virtual and physical servers
- Optional infrastructure (PXE) server provides unique environment for system management which boots from the network and does not require additional CDs

Paragon Drive Backup 9.0 Enterprise Server includes: 1 Enterprise Server edition and 10 Workstations.

Drive Backup Workstation can be completely automated by scripts and/or scheduling and can be remotely controlled by an administrator via the special Paragon Remote Management (PRM) Console - which is also included with the product . Learn more at www.drive-backup.com

System Requirements

- * CPU: Intel Pentium or compatible, 233MHz or higher processor
- * RAM: 128 MB of RAM required (256 MB or greater recommended)
- * Disk space: 120 MB
- * Internet Explorer 5.0 or higher

Supported Operating Systems

- * Windows Vista (32/64-bit)
- * Windows XP Professional (32/64-bit)
- * Windows XP Home
- * Windows 2000 Professional SP4
- * Windows 2000 Server Family SP4
- * Windows Server 2003 Family
- * Windows Server 2003 x64 Edition
- * Windows Small Business Server 2003 Family
- * Windows Storage Server 2003
- * Windows 2008 Server Family

Supported Hard Drives and Removable Media

- * Parallel ATA (IDE) HDD
- * Serial ATA (SATA) HDD
- * SCSI HDD
- * All levels of SCSI, IDE and SATA RAID controllers
- * CD-R/RW
- * DVD-R/RW and DVD+R/RW and DVD+/-R (DL)
- * Blu-ray Disc-R / Blu-ray Disc-RE
- * USB 1.x/2.0 and IEEE 1394 (FireWire) devices
- * PC card storage devices

Supported File Systems

- * NTFS (v1.2, v3.0, v3.1)
- * FAT16 / FAT32
- * Linux Ext2FS / Linux Ext3FS / Linux Swap
- * HPFS
- * Apple HFS+
- * Other file systems (in Sector-by-Sector mode)
