Paragon Software Announces Hard Disk Manager 2011 Suite for Home Users

Latest version of Paragon Hard Disk Manager Suite is the most complete disk management solution available and includes every tool necessary for managing hard disks flexibly and safely

IRVINE, CA, January 18, 2011, – [Paragon Software Group \(PSG\)](#), the technology leader in innovative data security and data management solutions, launches Paragon Hard Disk Manager 2011 Suite, the latest version of its multiple award-winning disk maintenance and safety suite. This powerful software provides all the essential tools to manage today's hard drives, including partitioning, backup & restore, migration, optimization & defragmentation, hard drive disposal, boot management and system recovery. Keeping this tool to hand is a guarantee for every home user that any disk maintenance task will be easily and promptly resolved all from one single interface.

Packed with strong new features, Paragon Hard Disk Manager affords everything you may need for managing hard disks. Hard Disk Manager 2011 Suite allows you to move any Windows OS since XP from a regular hard disk to a fast SSD (Solid State Drive) even of a smaller capacity, thanks to its advanced data exclusion capabilities. The new Automatic Partition Alignment feature optimizes the performance of your hard disk during partitioning/copy operations. Support for the latest HDD standards is also included giving support for AFD (Advanced Format Drive), 2TB+ and non-512B sector size drives.

Why Hard Disk Manager 2011 Suite?

- Easily partition your hard drives and keep them optimally sized.
- Manage multiple operating systems (up to 16) on a hard drive.
- Protect your entire PC, including the operating system, applications, your settings, and all data files with easy-to-use backup tools.

- Continue working on your computer while making backups.
- Restore the entire disk contents in minutes - no reinstallations required!
- Start the recovery process during startup of your computer, even if your operating system has failed.
- **NEW >** Enjoy support of a wider range of hardware configurations with the option to add drivers for specific hardware on-the-fly with WinPE 3.0 recovery media.
- **Update >** Start up your system on a different hardware platform (P2P).
- Easily clone an entire drive or the required partition.
- **NEW >** Move any Windows OS since XP from a regular hard disk to a fast SSD even of a smaller capacity.
- **NEW >** Automatically align partitions during partitioning or copy to optimize performance of your drive.
- Tune your system for maximum performance with a powerful defragmentation utility.
- Maintain the confidentiality of your deleted data forever with a disk wiping utility.
- USB 3.0 ready.
- New support for exFat. Accomplish backup, restore operations with exFAT (Extended File Allocation Table), a file system developed by Microsoft Corporation particularly for modern high capacity flash storages. It can boast support for drives up to 16 exbibytes in size, files much larger than 4GB, larger cluster sizes, etc.
- **NEW >**Check FS Integrity and Data Loss Policies. Specify the acceptable balance between the operation performance and the risk of data loss.
- All available Paragon Hard Disk Management technologies are available in one suite.
- Flexible and reliable overall system control at a low cost.
