WILDFLOWER PARTNERS WITH PARAGON SOFTWARE TO OFFER DISASTER RECOVERY AND DATA SECURITY SOLUTIONS

Paragon's Drive Backup will Provide Data Security, Storage Management for Wildflower Clients Nationwide

IRVINE, Calif., February 15, 2011 – [Paragon Software Group \(PSG\)](#) the technology leader in innovative data security and data management solutions, is pleased to announce a strategic partnership with [Wildflower International, LTD](#), a leading provider of information technology and services to the US Government and its prime contractors. This partnership enables Wildflower to address their federal customers' data security and disaster recovery needs with Paragon's cutting edge technology that fits limited federal budgets.

Wildflower designs comprehensive solutions that are custom-tailored to their clients' requirements, providing advanced technology from top-tier vendors, augmented with high-quality services at competitive prices. With data availability and business continuity being one of the issues that all Wildflower customers are facing, the partnership with Paragon is a natural extension of their product offering.

Paragon Software provides innovative backup, disaster recovery, virtualization, migration as well as system optimization technologies that help Wildflower architect and deliver powerful, yet affordable solutions by integrating them with complementary products or by using Paragon products as stand-alone solutions.

"The partnership with Paragon is a triple-win," explains Kimberly deCastro, Wildflower President & CEO. "It helps us offer software solutions with cutting edge technology and superior service and support, and it allows our customers to extend the reach of their IT budgets through significant capital cost savings, while increasing

efficiency and utilization of their IT infrastructure and resources. Paragon is proving every day that they are 100% committed to providing the highest level of service to Wildflower and our customers, both pre- and post-sale,” deCastro adds.

“Wildflower is one of those rare solution providers that really take the time to understand the technical requirements and the unique nature of each of their customers and are committed to using only the most robust and most cost-effective solutions,” says Daniel Eickhoff, Director of Channel Sales at Paragon Software Group, Inc. “Paragon’s disaster recovery and system optimization solutions are a perfect fit for their Government customers.”

About Wildflower

For fifteen years, Wildflower International, Ltd. has focused its multi-million dollar resource base on serving the evolving and multi-faceted needs of its primary customer, the United States Federal Government. Wildflower is New Mexico's largest woman-owned business, recipient of the New Mexico's Top 25 Women Owned Businesses Award for the past eight years. As a competitive and integral provider of information technology to the U.S. Federal Government and its prime contractors, Wildflower is deeply committed to the issues of security and confidentiality. Wildflower proudly partners with leading IT manufacturers to serve its customers' strategic objectives. In collaboration with companies such as Hewlett Packard, F5 Networks, Cisco Systems, Dell Inc., MPC, and Gateway, the company caters to the dynamic needs of the national security and scientific research communities.
