Paragon Releases Drive Backup 8.51 Corporate line

New Generation of Storage Lifecycle Management for Small and Medium Size Enterprises

April 2007 – San Jose

Paragon Software Group, the leading provider of innovative, reliable technologies and software solutions in the field of storage management and data safety, announces a step forward in backup technologies by releasing a new edition of Paragon Drive Backup. With Paragon's Remote Management Support (PRM) it now provides a centralized administration and maintenance of client stations.

“From now by using Drive Backup 8.51 our company-clients can forget about all-the-time business safety control,- says Konstantin Komarov, CEO of Paragon Software Group,- by our flagship product Drive backup Enterprise Server Edition we make simplify the whole backup/restore control at most, thus we make them calm down and work without fear”

To show all the benefits of the PRM system, let's take a company of several servers and workstations.

By installing the PRM Console on the system administrator computer and the PRM Client on all the others, backup can be remotely done. Besides, in case a file server with the preinstalled PRM Client is used as an archive storage, then you can easily set up automatic backup to NAS. Thus with our product a typical average company gets simplified and automated backup procedure.

In the conclusion we should say that Drive Backup 8.51 product line includes several editions: Professional, Server, Small Business Server and Enterprise Server Edition to satisfy every customer's needs from small business to enterprises.

About Paragon
