Paragon Software Group releases advanced Recovery CD for partitioning and backup products

Paragon and Microsoft® technologies combine to create a new recovery solution

January 2007 – San Jose

Paragon Software Group, the leading provider of innovative, reliable technologies and software solutions in the field of storage management and data safety, announces the release of an advanced Recovery CD based on Microsoft Windows® PE that allows users to recover systems that were previously unrecoverable.

“We have performed many customer surveys working to understand how and when our customers use Paragon standard Recovery CD.”- says Konstantin Komarov, CEO of Paragon Software Group, “By releasing a Win-PE- based Recovery solution we are providing our customers with an almost foolproof recovery solution.”

The new Windows PE solution is identical to our Linux based solution in both functionality and in hardware support. By providing this additional toolset our customers have a recovery solution that will work with even the most unique, complicated hardware configurations.

Paragon Recovery CD will be available with Paragon Partition Manager 8.0.

Paragon Software Group- Company Profile

Paragon Software Group (PSG) is a German based company founded in 1994, with offices in USA, Germany, and Russia. Paragon Software Group is also active in Asian markets.
